## **Summary**

Expertise combines a very effective blend of the technical and commercial understanding of resource projects necessary for successful realization of value. John is entrepreneurial economic geologist and since 1988 he has worked as a geological consultant and later he became a founder and manager of three public resource companies raising a total of US\$60 million which are successfully exploring and developing gold and base metal projects in Europe, and sub-Saharan Africa. John previously worked as an associate for consultancies such as Crowe Schaffalitzky and Associates based in both Ireland and Australia and as Senior Associate Geologist with Chlumsky Armbrust & Meyer LLC which is based in Denver, USA. His consulting assignments have taken him from the Sahel of sub-Sahara to the Tapajos of the Amazon Basin to the far east of Siberia and the outback of Australia and the jungles of Indonesia. He was part of very small teams which discovered and sourced several multi-million ounce gold deposits in Africa. John is professionally accredited geologist (P.Geo and EurGeol) and holds a Master's Degree in Geology Pennsylvania State University and a MBA from the Edinburgh School of Business, Heriot-Watt University, Scotland.

John has demonstrated the tenacity, patience and focus required to successfully implement many of his visionary ideas over the years. He is very creative in the way he can negotiate value-creating deals and he is a very effective at marketing and promoting his ideas in the way he uses the STICK approach to communicating what are often complex technical ideas in a concrete way that can be easily grasped by the investment community. He is a motivational team builder through sharing his vision. He is committed to the development of young geologists through mentoring and supportive delegation. He is managing Director of his own Geological Consultancy - Irus Consulting Ltd [www.irusconsulting.com](http://www.irusconsulting.com). John has recently refocused his career from the management of public companies to advisory and consultancy so as to concentrate more on applying his extensive international experience in the effective exploration and discovery of new ore deposits.

## **Specific Expertise includes:**

Blending his strong technical expertise with business acumen

- ◆ Strategic high-level advisory
- ◆ Effective Marketing (raising US\$60m)
- ◆ Guidance and assistance on project generation and acquisition and implementation
- ◆ Core team-capacity building & motivation and effective management of consultants
- ◆ Rapid identification of key project value-drivers and potential fatal flaws – SWOT analysis)

## **Executive Management:**

<b>2007 June – Present</b>	Exploration Director of Sovereign Mines of Africa - (Aim- listed July 2011).
